

Data Driven, Data Precision

About Our Company

IntraVex is the premium provider of multi-modal parcel and freight invoice processing and data analysis services.

IntraVex enables shippers to reduce costs by converting raw parcel and freight data into intelligent information. We provide customized data solutions that go beyond traditional audit providers and integrate those solutions directly into clients' core business processes.

We achieve these results by:

- Increasing savings through data intelligence gathering
 - Merging all volume and modes to a singular database
 - Implementing savings-driven programs that achieve results, in addition to an audit
 - Leveraging data for both improved supplier contracts and elimination of shipper errors
- Aligning finance and logistics through integrated processes and data
 - Establishing billing standards and formatting across all modes and carriers
 - Allowing for granular visibility to all carrier spend
 - Linking shipping transaction directly to key order data components
 - Developing transportation financial analysis across companies, brands, channels and vendors
- Developing a vision and designing data to drive best practice transportation analytics

Our approach begins with the collection of data and ultimately creates comprehensive reporting and analysis tools for users to make more efficient and effective shipping decisions. IntraVex offers a unique, multilevel solution that is far superior to the typical parcel audit service.

JONATHAN SHAVER
President & Founder

Jonathan Shaver, President and Founder of IntraVex, has been a leader in the transportation field for 17 years. Prior to launching IntraVex, Mr. Shaver worked on Pitney Bowes' Strategic Marketing staff, participating in key roles focused on parcel carrier technology initiatives. Shaver received his BS from the University of Missouri and MBA from Northwestern University's Kellogg School of Management. He is on the Executive Board of the Freight Transportation and Consultant Association, CSCM, and the Transportation Consumer Protection Council. He also serves as a columnist for PARCEL magazine and speaks at various industry conferences.

The IntraVex management team also includes various executives from the asset-based parcel carriers with expertise in parcel carrier pricing and information technology.
