Big Brands Count on Agile Network for Global Parcel Shipping Software
The world's largest retail and consumer product companies rely on AgileShip to deliver more features, carrier selections, certified business application integrations, multi-origin shipping capabilities, and high volume performance required for enterprise fulfillment.

Full-Featured, Multi-Carrier, Multi-Location Enterprise Shipping & TMS Platform

AgileShip handles the entire supply chain execution process — from order-level rating and routing, through pack verification, weighing, consolidation, manifesting, and labeling — in 'black box', 'attended station', and 'print-and-apply' configurations. The business rules-based solution includes a complete management dashboard and fully integrated invoice reconciliation — features which helped earn Agile Network exclusive status as a FedEx Diamond Compatible Solution Provider.

Broadest Selection of Carriers & Services

AgileShip provides 100% compatible support for all FedEx, UPS, DHL, and US Post Office delivery services. The solution also supports certified rating, routing, and execution through hundreds of regional freight and parcel carriers, including: TNT, OnTrac, Eastern Connection, CanPar, Purolator, Royal Mail, Deutsche Post, La Poste, DPD and more. Greater selection means more ability to meet the customer need with a money-saving option.

Certified Integration with Every Major ERP and WMS

AgileShip provides unprecedented ability to integrate with leading supply chain applications through multiple touch points. This includes support for Oracle EBS and OTM, SAP, Microsoft Dynamics, Epicor, JDA, Manhattan Associates, and HighJump, among others. The solution also offers plug-and-play integration with leading material handling and robotic warehouse solutions.

OmniChannel Capability & Enterprise Grade Performance

AgileShip supports deployment throughout the supply chain; delivering integrated shipping capabilities to suppliers, distribution centers, and retail locations. The solution also provides benchmarked performance required to rate, route, and execute more than 60,000 shipments per hour.
