

... the leader in freight bill audit, payment and business intelligence services

Cass Information Systems, Inc. is the market leader in Freight Invoice Audit and Payment solutions. We help customers reduce processing costs, ensure invoice accuracy, and provide actionable transportation data. Cass' comprehensive parcel spend management solutions help to reduce and manage your parcel shipping expenses. Our complete parcel audit includes duplicates, rates, manifested and not shipped, accessorials, adjustments as well as compliance and service failure audits. We also will allocate parcel spend to meet complex general ledger requirements. In addition, Cass' web-portal provides data visualization dashboards and ad-hoc reporting to help you further manage and reduce your parcel spend.

Understanding and controlling parcel costs is nearly impossible without clear visibility into detailed cost components, trends and more. With Cass, this information is easily available to you. With a few clicks, you will be viewing information for thousands – or hundreds of thousands – of shipments, by facility, account number, carrier, charge type, and more. Our clients consistently achieve high, ongoing value by leveraging the tools provided through CassPort®, our analytics and business intelligence engine.

With Cass you can:

- ▶ Identify persistent problems
- ▶ Ensure each package is audited
- ▶ Be prepared for negotiations
- ▶ Know your true cost per package
- ▶ Invoices are processed and paid
- ▶ Understand the effects of a new contract or GRI (General Rate Increase)
- ▶ Bridge the gap between purchasing and transportation

If your company ships over 100,000 packages annually we can provide substantial savings for your company. Reduce processing expenses, stop overcharges, accurately allocate costs, and receive critical parcel data. Contact Cass today to see how we help create a competitive advantage through reduced costs, increased efficiency, and better decision making capability.
