

SpanTech is a global leader in providing Turnkey Plastic Chain Conveyor Systems. Through product evolution and innovation, we provide our customers with the lowest total cost of ownership, as well as the longest service life available. Unlike others, we are the only company in the plastic chain conveyor industry that manufactures all of its components, thus controlling the quality of the complete product offering. We are able to provide the shortest turnaround time frame (order to shipment) in the industry, with many of our products shipping within 6-10 days from receipt of order.

Span Tech Sortation Technology, offers The TranSorter — a “game-changing” sorter design for the Production, Warehouse & Distribution markets. The TranSorter can sort anything! From polybags weighing grams to a 2' x 2' fifty pound carton. The sortation marketplace can benefit from our years of experience in developing innovative equipment, following our long tradition of providing material handling equipment with the lowest total cost of ownership.

We continue to be proud of the fact that we build and support conveyor systems globally. We supply systems to all of the Americas, Canada, Mexico, Scandinavian and EU regions, UK, South Africa, Australia, Japan and China. As our founder, James “Bud” Layne, says: “When you buy something from us, you are somebody very special. I want you to be happy with your Span Tech experience. My life’s goal is to build the very best conveyor equipment on this earth.”

When it comes to product innovation, quality and endurance, we have no equal.
